

Training Partners,

We're less than three weeks away from your transition to the Absorb Learning Management System for all U.S. Center for SafeSport trainings. Please note these important activities and timeframes to ensure a smooth transition:

TOMORROW! Absorb Overview Webinar

In this hourlong Wed. Oct. 28 webinar (1 p.m. MDT/3 p.m. EDT), we will showcase the new platform and answer questions on how the system will better serve your organization and members. **[Register here ASAP](#)** if you haven't already.

Important LMS Administrator Training

Our comprehensive training for your team consists of two main parts:

1. **Self-paced and on-demand modules:** The first step for your training administrators is to take several self-paced training modules (~90 minutes) in Absorb. To access these modules, you or your administrators should have completed this [Administrator Access Request Form](#) and sent it to SafesportLMS@safesport.org. From there, you or your administrator(s) get a password-reset email to access the demo site and training modules. [Follow these instructions](#) to access the training modules, which will remain available when the platform is live.
2. **Webinar next week:** [Register here](#) for our 9:30 am MST (11:30 EST) Wednesday November 4 webinar training, which will reinforce key points from the self-paced modules and demonstrate them in practice on the Center's Absorb interface. We will also take questions to help you better understand how to navigate Absorb.

November 18: Go-Live Day

Upon your formal Nov. 18 transition to the Absorb platform, member access to the sunsetting 77Media platform will be deactivated, and all your training going forward will occur in Absorb. We at the Center will maintain 77media access for some time as a safety net for data before retiring it completely.

All your members, historic records, purchases, and enrollments should be in Absorb by the Go-Live date. Your administrators can support your members on the new platform starting Nov. 18 as well—highlighting the importance of completing administrator training by then.

As always, view our [Project FAQ](#) or email SafesportLMS@safesport.org with unanswered questions you might have. Thank you for your attention to these next steps as we continue to serve you throughout this transition.

Sincerely,
The SafeSport Support Team
