

We are excited to share more information about the new Learning Management System as well as the process you can expect. The Learning Management System Support Team is ready to guide your organization through the process and ensure a smooth and successful transition. Here are some benefits of the new Learning Management System from **Absorb**.

Smart administration: Not only will your administrators have quick access to all your learner's information and history, but many administrative functions can be automated! Specific reports can be automatically generated and emailed on a scheduled basis. Certificates can be generated on demand by both the learner and the local administrators.

Learner Experience: The learner experience will be enhanced with easy-to-use interfaces, help tutorials and FAQs just a click away, and certificates and transcripts easy to access and export.

Advanced Reporting: Reporting capabilities that allow you to customize your reports to get the right information that you need: Reporting that is highly configurable, easy to share and easy to template for recurring reports.

Your SafeSport Support Team will help transition you to the new Learning Management System with self-paced and group training, clearly defined steps, and responsive support.

Webinar:

We will be hosting a live presentation that will include overview and demonstration of the system on **October 28th at 1 PM MST**. The goal of this webinar will be to show some of the capabilities of Absorb and answer general system-related questions. This webinar will be one hour and you can invite multiple people from your organization. This will be most beneficial for leaders and LMS administrators to attend. We will send an invitation to the same email addresses in this announcement for you to share with those you would like to attend. We will record this session and host it for those that were not able to attend live.

Timeline:

Your organization's **GO-LIVE** date has been scheduled for **Wednesday November 18th**. At that time, all new training will be completed on the Absorb platform going forward. We will communicate each activity weekly with clear actions by the Support Center and any actions on your team's part. Please inform us of any concerns you have about that date by contacting safesportLMS@safesport.org by Friday October 23rd.

Important note: Although we will migrate all training records and completion histories into Absorb, we cannot import partial completions. If a learner has begun a course in 77Media prior to November 18th, but did not complete by November 18th, they will have to start the course over in Absorb. It is recommended that those learners complete any training they started prior to November 18th on the 77Media platform before that date.

What we need from you:

Ensure you have sent us a form ([Link here](#)) for each administrator who would have responsibility to verify training access and to pull reports.

Provide the contact information for a technical support individual that can help us with setting up your connection to the new LMS if applicable.

In the last communication, we asked you to discuss this transition with your team, and provide us feedback and specific requirements that will help guide the SafeSport Support Team in meeting those needs. Please email that information to safesportLMS@safesport.org. Include the name of your organization and a contact person that we can follow up with questions as needed.

Questions? Check the updated FAQ document [here](#) to find the answers to your questions. For any unanswered questions, email SafesportLMS@safesport.org.

Best,
The SafeSport Support Team
